Bakame Ai

Bakame AI — List of Subprocessors

Last updated: November 2025

Bakame AI engages carefully vetted subprocessors to help operate the platform. These partners process limited data strictly as necessary to provide Bakame's Services and under written agreements requiring confidentiality, security, and compliance with applicable data protection laws.

Current Subprocessors

Subprocessor	Location	Purpose of Processing
Replit, Inc.	USA	Hosting and execution of development and backend systems
OpenAI, Inc.	USA	Language model processing for generating responses
ElevenLabs, Inc.	USA	Text-to-speech and voice synthesis
Twilio, Inc.	USA	Telephony, voice routing, SMS
Supabase (Supabase Inc.)	USA/EU	Authentication, database, secure storage
Amazon Web Services (AWS)	USA/EU	Cloud hosting, compute, and storage

Subprocessor Requirements

All subprocessors must:

a) Maintain industry-standard security controls
b) Use data only as instructed by Bakame
c) Implement confidentiality safeguards
d) Support data deletion and access requests
e) Comply with global privacy and data-transfer laws

Updates to This List

Bakame will provide notice of new subprocessors at least 30 days before they begin processing Customer Personal Data.
